

SIEMENS DATA SCIENCE MASTER

VIRTUAL INTERNSHIP

Internship Presentation

Akshita Yadav

Roll Number: 2410031596 | Section: 3CSE12

B.Tech (CSE) | IILM University, Greater Noida

June 2026 – August 2026

PROGRAM

AICTE – EduSkills Virtual Internship Program

DURATION

8-Week Virtual Program

Internship Overview

Program

AICTE – EduSkills Virtual Internship Program

Domain

Siemens Data Science Master

Duration

8 Weeks | June – August 2026

Mode

Virtual

Institution

IILM University, Greater Noida

Core Focus

Data Science, Data Engineering, Machine Learning, Data Preparation

Internship Objectives

- Understand fundamental concepts and applications of Data Science.
- Identify problems that can be addressed using AI and Machine Learning.
- Understand data access, loading, transformation and preparation.
- Develop foundational and advanced Machine Learning knowledge.
- Understand model deployment, monitoring and platform administration.
- Develop industry-relevant technical, analytical and problem-solving skills.
- Complete weekly assessments and final credential validation.

Internship Problem Statement

How can raw data be transformed into meaningful information for decision-making and intelligent applications?

THE CHALLENGE

Organizations generate large volumes of data from different sources. The key is to transform this data into useful information and intelligent applications.

Technologies & Concepts Covered

Data Science

Data processing, analysis, ML and domain knowledge.

Data Engineering

Accessing, loading, transforming and preparing data.

Machine Learning

Models, workflows, prediction and classification.

Data Preparation

Organizing and transforming raw data.

AI Applications

AI/ML for business and real-world problems.

Deployment & Monitoring

Concepts for deploying and monitoring ML models.

Platform Administration

Configuration and management with exposure to RapidMiner AI Hub.

Data Science Workflow / System Architecture

Week-Wise Internship Activities

Learning & Practical Exposure

- Identifying AI and Machine Learning problems.
- Working with data access, loading and transformation.
- Understanding data preparation and handling techniques.
- Learning foundational and advanced Machine Learning concepts.
- Understanding AI/ML applications, deployment and monitoring.
- Gaining exposure to RapidMiner AI Hub and enterprise AI environments.
- Progressing from professional-level to master-level modules.

Certifications & Completion

PROFESSIONAL CERTIFICATIONS

Applications & Use Cases Professional
Data Engineering Professional
Machine Learning Professional

MASTER CERTIFICATIONS

Data Engineering Master
Machine Learning Master
Applications & Use Cases Master
Platform Administration Master

COMPLETION

Final Credential Validation / Internship Grade Point Assessment

Skills Developed

TECHNICAL SKILLS

- Data Science
- Data Engineering
- Machine Learning
- Data Preparation
- AI Applications
- Model Deployment & Monitoring
- Platform Administration

PROFESSIONAL SKILLS

- Analytical Thinking
- Problem Solving
- Self-Learning
- Time Management
- Technical Documentation
- Assessment Preparation

Challenges & Learning Experience

CHALLENGE

Understanding how Data Engineering, Data Preparation, Machine Learning, Deployment, Monitoring and Platform Management connect.

LEARNING APPROACH

The progressive week-wise structure helped connect concepts effectively.

PROGRESSION

Professional modules built foundations; master modules introduced advanced topics.

KEY TAKEAWAY

A structured workflow connects individual technical concepts into an end-to-end Data Science process.

Conclusion & Future Scope

CONCLUSION

The internship provided structured understanding of Data Science, Data Engineering, Machine Learning, AI Applications, Deployment, Monitoring and Platform Administration.

FUTURE SCOPE

Advanced Machine Learning, Deep Learning, real-world datasets, cloud platforms, MLOps, Big Data and AI-powered applications.

THANK YOU

Akshita Yadav | 2410031596 | 3CSE12
